PROFESSIONAL SUMMARY

Software developer with experience in the MERN stack from coding bootcamp training and personal projects. Self-taught in C++ and game development using Unreal Engine. Professional background in banking, sales and a Bachelor of Arts. Looking to continue learning and grow my career in software development.

TECHNICAL SKILLS

- **Languages:** JavaScript, C++, HTML5, CSS3
- **Frameworks & Libraries:** React, Node.js, Express, MongoDB
- **Tools:** Git, VSCode, Microsoft Excel, Adobe Creative Cloud
- **Concepts:** REST APIs, CRUD, Agile, Scrum
- **Game Development:** Unreal Engine, Blueprints

EDUCATION

Per Scholas | Software Engineering | Remote | *May 2025*

- 15-week intensive programming bootcamp focused on full-stack development using the MERN stack.
- Coursework: HTML, CSS, JavaScript, TypeScript, MongoDB, React, Node.js, Express, Git.

Queens College | Bachelor of Arts in History | Queens, NY | *January 2022*

- Relevant Coursework: Corporate Finance, Economics, Computer Science, Business, Graphic Design

PROJECTS

Full Stack Game Browser App | [Demo](#) | [Github](#) | MERN Stack | 2025 - Present

- Developed RESTful API and integrated third-party RAWG API for real-time game data.
- Implemented authentication, user profiles, and MongoDB with Mongoose.
- Built responsive UI using React, React Router, and custom CSS.
- Managed state using Context API and handled async calls with Axios.

Cops N' Zombies | [Game](#) | Unreal Engine, C++ | Solo Developer | 2023 - Present

- Built core logic and 10+ gameplay systems, as well as 3 diverse levels utilizing and editing 3D assets, created 15+ UI elements focusing on player experience and design
- Utilized and refactored [ALS](#) (third-party networked movement system code) to implement game features including weapon systems, animations, status effects, and specialized movement modes.

PROFESSIONAL EXPERIENCE

Sales Experience Associate | Samsung Electronics | Queens, NY | *September 2025 – Present*

- Showcased personalized demos and product education for Samsung mobile and smart / XR devices.
- Resolved technical and product inquiries and recommended tailored solutions for customers.

Associate Banker | J.P. Morgan Chase & Co. | Goleta, CA | *May 2023 - January 2024*

- Generated new business opportunities by developing client relationships.
- Processed 50+ complex banking transactions daily while ensuring 100% compliance with regulatory requirements, utilizing banking software platforms.
- Trained and mentored new bankers, while focusing on efficiency and integrity.
- Taught clients about products and technology features to enhance their experience with Chase.

CERTIFICATIONS

Introduction to Software Engineering | IBM | Coursera | April 2025 | [Verified Certificate](#)

- Covered Software Development Lifecycle (SDLC), programming tools, and tech stacks
- Learned Python basics and other programming fundamentals such as loops and conditionals
- Learned about application and deployment architectures, and software design patterns
