

Shahed Adnan

Queens, New York | shahed6804@gmail.com | 347-206-2340 | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Professional with experience in software engineering, game development, banking, and customer service. Skilled in front-end and back-end web development using HTML, CSS, and JavaScript, with self-taught experience in C++ and Unreal Engine for software and game development. Great at building client relationships, driving sales, and excelling in both team and leadership roles. Looking to expand my programming knowledge and apply my skills on meaningful projects.

TECHNICAL SKILLS

- **Languages:** JavaScript, C++, HTML, CSS
- **Frameworks/Libraries:** React, Node.js, Express
- **Tools:** Git, MongoDB, Microsoft Excel, Adobe Creative Cloud, VSCode
- **Methodologies:** Agile, Scrum
- **Game Development:** Unreal Engine

EDUCATION

Per Scholas | Software Engineering | Remote | *May 2025*

- 15-week intensive programming bootcamp focused on full-stack development using the MERN stack.
- Related Coursework: HTML, CSS, JavaScript, TypeScript, MongoDB, React, Node.js, Express, Git.

Queens College | Bachelor of Arts in History | Queens, NY | *January 2022*

- Relevant Coursework: Corporate Finance, Economics, Computer Science, Business, Graphic Design.

PROFESSIONAL EXPERIENCE

Associate Banker | J.P. Morgan Chase & Co. | Goleta, CA | *May 2023 - January 2024*

- Generated new business opportunities by developing client relationships.
- Processed 50+ complex banking transactions daily while ensuring 100% compliance with regulatory requirements, utilizing banking software platforms.
- Trained and mentored new bankers, while focusing on efficiency and integrity.
- Taught clients about products and technology features to enhance their experience with Chase.
- Managed customer satisfaction by maintaining high service standards and resolving issues promptly.

PROJECTS

Cops N' Zombies | [Game](#) | Unreal Engine, C++ | Solo Developer | 2023 - Present

- Developing a multiplayer horror social deduction game with in-depth weapon and movement systems, real-time player interaction systems, and complex AI behavior.
- Utilized and refactored [ALS](#) (third-party networked movement system code) to implement game features including weapon systems, animations, status effects, and specialized movement modes.
- Built core logic and 10+ gameplay systems, as well as 3 diverse levels utilizing and editing 3D assets, created 15+ UI focusing on player experience and design.

CERTIFICATIONS

Introduction to Software Engineering | IBM | Coursera | April 2025 | [Verified Certificate](#)

- Covered Software Development Lifecycle (SDLC), programming tools, and tech stacks
- Learned Python basics and other programming fundamentals (loops, conditions)
- Learned about application and deployment architectures, and software design patterns
